GULF COPPER

GLOBAL SERVICES VISION

With the global distribution of offshore assets, Gulf Copper provides fresh and innovative ideas to serve our clients maintenance and repair needs in remote or challenging locations, based on customer needs.

Gulf Copper's Global Services focuses on projecting skilled and experienced travel teams with complete project management tools, resources, and logistics management to ensure minimum downtime of customer assets by strict adherence to approved schedules.

GULF COPPER

HISTORY

- Gulf Copper, an employee-owned company, has existed over 60 years in the Industrial, Marine and Government service industries.
- Gulf Copper's management team of professionals brings over four centuries of industry experience.
- Gulf Copper began providing offshore services in 1994 with Sonat Exploration by providing prefabrication, project management, tooling and manning of offshore installations.
- Since 1994, Gulf Copper's offshore services have expanded worldwide to include services to customers in foreign countries such as equipment installation, repairs and field machining services.

- Customer base
 - Marine
 - Industrial
 - Government

GULF COPPER

GLOBAL PROJECT PHILOSOPHY

Gulf Copper has provided services for clients around the world. Our success record is based on our ability to work with our customers and plan the project in advance.

Our philosophy is simple:

“Know our customers’ needs, wants, biases and expectations.”

GULF COPPER

GLOBAL PROJECT PHILOSOPHY

- Gulf Copper's project team plans, schedules, and develops a Plan of Action & Milestones that assures proper manning, equipment, tooling, and logistic requirements arrive at the job site, anywhere in the world.
- The primary concern is that nothing is left to chance since many projects are in remote locations.
- Gulf Copper knows that pre-planning is the key to a successful project whether undertaking an offshore or foreign project
- This planning allows Gulf Copper to develop, custom highly skilled teams to meet our client's project needs.

The following is a sample foreign project synopsis:

GULF COPPER

PROJECT SYNOPSIS

- Receive project from customer
- Assemble project team consisting of:
 - Project Manager
 - Project Superintendents
 - Project Administrator
 - Logistic Manager
 - Safety Manager
 - Craft supervisors

GULF COPPER

PROJECT SYNOPSIS

- Meet with customer's project team members for work definition conference
